- Facilities Manager & Engineering Technician with Wygant (TDI). Responsible for simple electrical design layouts, PCB design and layout, phone switch call-plan programming. Phone and LAN connectivity for all employees to house servers and other miscellaneous maintenance tasks for three floors of the downtown Portland offices. Provide new web page designs and graphics for the company website and maintained its copy and content as web-master. Design, build and maintain custom commercial exhibits for trade shows. Pack and ship products and trade show materials as needed for timely arrivals. Commercial artist/ electrician/ web designer/ laborer/ all-around technician and craftsman in residence.
- There have been more than 120 employees I have supported over the years while with Wygant (TDI). When the company was sold to TDI, all departments were consolidated to the Arizona offices. Co-workers as well as TDI departments I started supporting were surprised, frustrated, and sad at my leaving. I maintained good relations with TDI and continued to work as a private contractor in consolidating the Portland offices during the transition.
